Project Name	Student Enrollment & Course Management System (SECMS)	**Maximum Marks**	5 Marks
Team Members	1. M. Gayathiri 2. I. Geetha 3. S. Harini 4. I. Harini Sri 5. S. Hemavathi	**Canvas**	Problem–Solution Fit

1. CUSTOMER SEGMENT(S) [CS]	***2. PROBLEMS / PAINS + ITS FREQUENCY [PR]***	***3. TRIGGERS TO ACT [TR]***
Primary: Enrollment Officer / Academic Enrollment User **Secondary:** Administrator and Instructor	• Student enrollment data is scattered across spreadsheets/emails. • Manual entry and rechecking can cause duplicate records/errors. • Approval follow-up is time-consuming. **Frequency:** Occurs regularly during registration, enrollment approval and reporting.	• New student registration periods • Course enrollment requests • Need for approval/validation • Need to check enrollment status or revenue • Reporting deadlines
4. EMOTIONS BEFORE / AFTER [EM]	***5. AVAILABLE SOLUTIONS – PROS & CONS [AS]***	***6. CUSTOMER LIMITATIONS [CL]***
Before: Frustrated by manual work, concerned about duplicate entries and approval bottlenecks, uncertain due to scattered data. **After:** More confident and relieved because centralized data, automation and dashboards reduce manual effort.	**Spreadsheets & emails:** Pros – familiar, easy to start. Cons – scattered data, duplicate/error risk, manual follow-up. **Standalone portal:** Pros – centralized interface. Cons – separate system/integration effort. **Salesforce SECMS:** Pros – centralized data, automation, reports/dashboards, role-based access. Cons – requires setup/configuration and user training.	• Limited time for manual data entry and follow-up • Dependence on existing spreadsheets/emails • Need for secure role-based access • Users need a simple, usable interface • Limited tolerance for duplicate/error-prone processes
7. BEHAVIOR + ITS INTENSITY [BE]	***8. CHANNELS OF BEHAVIOR [CH]***	***9. PROBLEM ROOT / CAUSE [RC]***
• Rechecks enrollment information • Manually follows up on approvals • Uses spreadsheets and emails • Cross-checks records before reporting **Intensity:** High during registration, approval and reporting activities.	**Online:** Salesforce Lightning app, web-based records, reports and dashboards, email communication. **Offline:** Administrative follow-up, meetings and manual coordination when required.	• Enrollment information is not centralized. • Manual/unintegrated processes create repeated data entry. • Approval and validation depend on manual follow-up. • Limited real-time visibility through dashboards. • Lack of centralized role-based access and automation.
10. YOUR SOLUTION [SL]	***SOLUTION FIT SUMMARY***	

Student Enrollment & Course Management System (SECMS) built on Salesforce. Centralizes student, course, enrollment and instructor information; automates validation and approval workflows; supports instructor assignment; provides reports/dashboards for enrollment and revenue monitoring; and uses role-based access.	**Problem:** Scattered/manual enrollment management. **Root Cause:** Lack of centralized data and automation. **Solution:** Salesforce-based SECMS with centralized records, automated flows/approval, role-based security and reporting dashboards. **Expected fit:** Faster processing, fewer manual errors/duplicates, improved visibility and easier monitoring.
