Solution Architecture

Field	Details
Date	15 March 2026
Team ID	6ab2a81f009dcca3125ab2e5
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Solution Architecture Diagram

High-level architecture of the Salesforce-based SECMS application.

Architecture Layer	SECMS Components	Main Responsibility
Presentation / Client Layer	Salesforce Lightning Experience Lightning App / Tabs Student, Course, Enrollment, Instructor, Payment and Dashboard screens	Provides the user interface for Enrollment Officers, Administrators, Instructors and other authorized users.
↓ / ↑	Salesforce user interaction	Users submit, view and update authorized records through the Lightning interface.
Application / Business Logic Layer	Salesforce Flows Validation Rules Approval Process Assignment / automation logic	Processes enrollment requests, validates data, manages approvals, automates actions and supports instructor assignment.
↓ / ↑	Salesforce platform services	Connects user actions with business rules, workflow and record updates.
Integration / Services Layer	Salesforce Reports & Dashboards Email / Salesforce notifications	Supports monitoring, notifications and operational visibility using Salesforce capabilities.
↓ / ↑	Salesforce platform integration	Moves processed information between application logic and stored records.
Data / Storage Layer	Salesforce Objects Student Course Enrollment Instructor Payment / related records	Centralized storage for project records and related enrollment information.

Architecture Flow

Step	Flow
1	Users → Salesforce Lightning Experience
2	Lightning interface → Salesforce Flows / Validation Rules / Approval Process
3	Business logic → Salesforce Objects and related records
4	Stored data → Reports & Dashboards / authorized user views

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface through which authorized users manage students, courses, enrollments, instructors, payments and dashboards.	Salesforce Lightning Experience, Lightning App, Tabs, Page Layouts
Application / Business Logic	Automates enrollment processing, validation, approvals, notifications and related business processes.	Salesforce Flows, Validation Rules, Approval Process
Integration / Services	Provides reporting, dashboards and platform-based notifications for operational monitoring and communication.	Salesforce Reports & Dashboards, Salesforce notification capabilities
Database / Data Layer	Stores centralized student, course, enrollment, instructor, payment and related records.	Salesforce Objects, Standard and Custom Objects
Security Layer	Controls access to records and application functions according to user responsibilities.	Profiles, Roles, Sharing / role-based access
