| **Date** | 30 September 2026 |
| **Team ID** | 6ab2a81f009dcca3125ab2e |
| **Project Name** | Student Enrollment & Course Management System (SECMS) |
| **Technology** | Salesforce |
| **Maximum Marks** | 5 Marks |
| **Team Members** | M. Gayathiri; I. Geetha; S. Harini; I. Harini Sri; S. Hemavathi |

## Code-Layout, Readability and Reusability:

This document evaluates the quality of the Salesforce project configuration in terms of its structure, readability, and reusability. Well-organized Salesforce objects, fields, flows, validation rules, reports, and dashboards help make the project maintainable and easier to extend or reuse in future development.

## Code Layout Checklist:

| S.No | Code Quality Parameter | Description | Followed (Yes / No / Partial) | Remarks |
|---|---|---|---|---|
| 1 | Consistent Indentation | Uniform formatting and naming are followed in configuration and documentation. | Yes | Salesforce configuration is organized consistently. |
| 2 | Proper File Structure | Objects, fields, flows, reports and dashboards are logically organized. | Yes | Project components are separated by function. |
| 3 | Meaningful Variable Names | Object, field and flow names clearly reflect their purpose. | Yes | Examples: Student__c, Enrollment__c, SetEnrollmentDate. |
| 4 | Function / Method Names | Automation components are descriptively named. | Yes | Flow names clearly describe their actions. |
| 5 | Code Comments | Descriptions and documentation explain important project logic. | Yes | Milestones and automation logic are documented. |
| 6 | Modular Design | The solution is divided into reusable objects, flows and reports. | Yes | Separate components handle different operations. |
| 7 | No Redundant Code | Duplicate or unnecessary automation is avoided. | Yes | Automation is divided into specific flows. |
| 8 | Error Handling | Validation rules prevent invalid or incomplete records. | Yes | Email and enrollment validation rules are used. |

## Reusable Components / Modules:

| S.No | Component / Module Name | Language / Technology | Where Reused | Reusability Level |
|---|---|---|---|---|
| 1 | Student__c Object | Salesforce | Student record management | High |
| 2 | Course__c Object | Salesforce | Course creation and management | High |
| 3 | Enrollment__c Object | Salesforce | Enrollment processing and tracking | High |
| 4 | SetEnrollmentDate Flow | Salesforce Flow | Automatically sets enrollment date | High |
| 5 | AutoAssign_Instructor Flow | Salesforce Flow | Assigns instructor based on course category | High |
| 6 | Change_Owner_To_Instructor Flow | Salesforce Flow | Controls enrollment record ownership | High |
| 7 | Validation Rules | Salesforce | Student email and fee validation | High |
| 8 | Reports & Dashboards | Salesforce | Monitoring enrollment, status and revenue | Medium |

## Overall Code Quality Assessment:

| Aspect | Rating (1-5) | Comments |
|---|---|---|
| Code Layout & Structure | 5 | Salesforce objects and automation components are logically structured. |
| Readability | 5 | Names and configuration steps are clear and easy to understand. |
| Reusability | 5 | Flows, validation rules, reports and objects can support future modules. |
| Documentation / Comments | 5 | Project milestones and implementation details are documented. |
| Overall Score | 5 / 5 | The project follows a clear, modular and reusable Salesforce configuration. |
