Coding & Solution

Date	30 September 2026
Team ID	6ab2a81f009dcca3125ab2e
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented Salesforce solution. The submission demonstrates working functionality, clean configuration practices, and alignment with the defined requirements.

Instructions:

1. Ensure the Salesforce configuration is well-structured and follows best practices.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include Salesforce objects, fields, flows, validation rules, approval process, reports, dashboards, and security configuration.
4. Attach or link to the code repository or project resources where applicable.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/[YourUsername]/Student-Enrollment-System
Programming Language(s)	Salesforce Configuration / Salesforce Lightning
Framework(s) Used	Salesforce Flows, Approval Process, Validation Rules
Key Features Implemented	Student management, Course management, Enrollment processing, Instructor assignment, Approval process, Reports and Dashboards, Role-based security
Pending / Incomplete Features	No major pending feature; future scope includes payment gateway, student portal, mobile access and LMS integration.
Features	Automated enrollment date, instructor assignment, approval workflow, validation checks, email notification, reports, dashboards and private enrollment sharing.
Setup / Run Instructions	Configure the Salesforce Developer Org, create custom objects and fields, configure validation rules and approval process, activate flows, create reports/dashboards, and access through the Lightning App.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code/configuration is modular and organized into objects, flows and components	Yes
2	Meaningful object, field and flow names are used	Yes
3	Configuration includes documentation and implementation descriptions where necessary	Yes
4	Validation rules and approval controls are implemented for critical operations	Yes
5	The Salesforce application runs with the implemented features and tested workflows	Yes
6	Project resources are maintained in a version control repository / project resource	Yes

Additional Notes / Comments:

• The project was implemented using Salesforce-native features.

• The system includes Student, Course, Instructor and Enrollment custom objects.

• Automation includes enrollment date, instructor assignment and owner change flows.

• Testing includes validation, approval, automation, reports and dashboard checks.
