Student Enrollment & Course Management System (SECMS)

Project Documentation – Filled Version

Field	Details
Date	30 September 2026
Team ID	6ab2a81f009dcca3125ab2e5
Project Name	Student Enrollment & Course Management System (SECMS)
Project Type	Salesforce Administrator with Automation
Team Members	M. Gayathri; I. Geetha; S. Harini; I. Harini Sri; S. Hemavathi

1. Project Description

The Student Enrollment & Course Management System is a Salesforce application designed to streamline and automate academic enrollment operations. It enables administrators, enrollment officers, and instructors to manage student records, courses, enrollments, instructor assignments, approvals, payments, reports, and dashboards within a unified Salesforce environment.

Key modules include Student Management, Course Management, Enrollment Processing, Instructor Assignment, Approval Process, Validation Rules, Reports, Dashboards, and role-based Security.

2. User Scenarios

Scenario	Description
1. Student Enrollment	An enrollment officer creates a student record, selects a course, and creates an enrollment request. The system validates the data and manages the request through approval.
2. Instructor Assignment	When an enrollment is created or updated, the system checks the course category and automatically assigns the appropriate instructor.
3. Approval & Payment	An enrollment with Requested status enters the approval process. Validation prevents approval when fees have not been paid.
4. Monitoring	Managers use reports and dashboards to monitor student status, course enrollments, pending approvals and revenue.

3. Technical Architecture

Layer / Component	Technology / Configuration
User Interface	Salesforce Lightning
Business Logic / Automation	Salesforce Flows
Data Layer	Salesforce Custom Objects
Validation & Approval	Validation Rules and Approval Process
Reporting	Salesforce Reports and Dashboards
Security	Organization-Wide Defaults, Profiles and Permission Sets

4. Prerequisites

- Salesforce Developer Org / Salesforce account
- Basic Salesforce Administrator knowledge
- Understanding of Salesforce Objects, Fields and Relationships
- Knowledge of Salesforce Flow and Approval Process
- Knowledge of Validation Rules, Reports and Dashboards
- Basic understanding of Salesforce security and sharing settings

5. Project Workflow / Milestones

Milestone	Activities
1. Developer Setup	Create/configure Salesforce Developer account and project environment.
2. Data Modeling	Create Student, Course, Instructor and Enrollment custom objects, fields, tabs and relationships.
3. Validation & Automation	Configure validation rules, record-triggered flows and automated instructor assignment.
4. Approval Process	Create and activate enrollment approval process with approval/rejection actions.
5. Lightning App & Security	Create Lightning App, page layouts, profiles, permission sets and OWD settings.
6. Reports & Dashboards	Create student, enrollment, approval and revenue reports and Student Management Dashboard.
7. Testing	Test validation, approval, enrollment date, instructor assignment, owner change, reports and dashboard refresh.

6. Data Model and Configuration

Object	Important Fields / Purpose
Student__c	Email, Phone, DOB, Status, Address
Course__c	Category, Duration, Course Fee, Description
Instructor__c	Instructor Code, Expertise, Phone, Email
Enrollment__c	Student, Course, Instructor, Instructor User, Enrollment Date, Enrollment Status, Fees Paid, Total Amount

7. Automation and Approval

Automation	Implementation
SetEnrollmentDate	Record-triggered Flow populates Enrollment Date when an enrollment is created.
Send Email When Approved	Flow detects Approved status, gets student information, sends email alert and updates Student status to Active.
AutoAssign_Instructor	Flow checks Course Category and assigns INSTR_A, INSTR_B or INSTR_C.
Change_Owner_To_Instructor	Flow changes Enrollment Owner to the assigned Instructor User for private OWD access.
Approval_Enrollment_Request	Requested enrollments are routed to the Training Manager User; final approval changes status to Approved and rejection changes it to Rejected with email alert.

8. Validation Rules

Rule	Condition / Expected Result
Student_Email_Domain_Validation	Student email must contain the institutional @student.edu domain.
Fees_Must_Be_Paid_Before_Approval	If Enrollment Status is Approved while Fees Paid is false, the system displays an error and prevents approval.

9. Security

Configuration	Details
Student__c	Public Read/Write
Course__c	Public Read/Write
Enrollment__c	Private; assigned instructor access is supported through Owner Change Flow
Enrollment Officer Profile	Enrollment Read/Create/Edit; Student Read; Course Read
Instructor Profile	Enrollment Read-only
Permission Sets	Dashboard Editor and Custom Object Access as appropriate

10. Reports and Dashboard

Report / Dashboard	Purpose
Students by Status	Group students by Active, Inactive and Graduated status.
Enrollments by Course	Monitor enrollment counts by course.
Pending Enrollment Approvals	Show enrollment records with Requested status.
Revenue Report	Show paid fees grouped by course and summarize Total Amount.
Student Management Dashboard	Donut chart for student status, bar chart for enrollments by course, table for pending approvals and gauge for revenue.

11. Testing

Test Case	Expected Result	Result
Create Student with invalid email	Validation error	PASS
Create Enrollment without Fees Paid and Approve	Validation error	PASS
Create Enrollment with Requested status	Approval process triggered	PASS
Create Enrollment	Enrollment Date auto-filled	PASS
Create Technical Course Enrollment	Instructor A assigned	PASS
Assign Instructor User	Owner changes to Instructor; other instructors cannot see record	PASS
Check Reports	Counts match records	PASS
Refresh Dashboard	Dashboard updates successfully	PASS

12. Deployment / Access Details

Field	Details
Platform	Salesforce Cloud / Salesforce Lightning
Developer Org	https://orgfarm-27651f0434-dev-ed.develop.lightning.force.com
Repository	https://github.com/[YourUsername]/Student-Enrollment-System
Demo Video	https://drive.google.com/file/d/1qAhAmp5QUOpQooPwYtHvH486TBdd8-Tb/view?usp=sharing
Login Credentials	Not provided in the source project document

13. Conclusion

SECMS streamlines the student academic lifecycle from registration to course completion by using Salesforce Validation Rules, Flows, Approval Process, Reports, Dashboards and private sharing. The supplied project documentation states that the milestones were implemented and tested.

14. Future Scope

- Payment gateway integration (Razorpay, Stripe)
- Student self-service portal via Experience Cloud
- Analytics-driven insights with Einstein Analytics
- Mobile access via Salesforce Mobile App
- Certificate generation automation
- Integration with LMS

Prepared using the supplied Sample Project Documentation template and the supplied SECMS project documentation.
